

DESCRIPTION

FOAM BRITE is a high foaming, non-fuming chemical cleaner designed to remove a variety of acid soluble contaminants in food processing facilities. Composed of a high concentration of food grade acid compounds and super high foam wetting agents for fast penetration of soils. Contains no hydrochloric, hydrofluoric, sulfuric, or nitric acids. **FOAM BRITE** contains no fragrances.

FOAM BRITE is ideal suited for alkaline scale removal and brightening of aluminum, galvanized metal and stainless steel equipment surfaces, demineralizing cooking equipment, concrete, tile and grout cleaning. Use at regular intervals as part of the optimum cleaning and sanitation program.

Use **FOAM BRITE** as a supplementary procedure following routine cleaning to remove scale build-up on metal equipment surfaces.

For additional product applications consult your Wechem Sales Consultant for application assistance.

DIRECTIONS

Dilution ratio will vary depending on the method of application, the extent of the soil load, foam level desired and the type of surface to be cleaned. Dilution should be adjusted by the user until optimal results are obtained. Apply diluted product and allow sufficient contact time for soil removal, do not allow product to dry on surface. Mechanical agitation will enhance chemical action. Rinse thoroughly with clean water to remove loosened soil and chemical residue. The following dilution table below may be used as a general guide.

USES	FOAM BRITE	WATER
Light	1 part	40 to 80
Medium	1 part	25 to 40
Heavy Duty	1 part	10 to 25
Extra Heavy Duty	1 part	3 to 10
