

DESCRIPTION

IRON WASH is a caustic compound designed for use in enclosed high pressure spray cabinet systems. IRON WASH is ideal for cleaning heavy dirt, grease, and oil from engine blocks, brake shoes, and heavily soiled steel and iron parts. The high alkaline intensity and buffered wetting agents remain strong and stable under high temperatures for long periods of time. IRON WASH should not be used on aluminum, zinc, and tin. May be used as a hot vac compound.

DIRECTIONS

ENCLOSED HIGH PRESSURES SYSTEMS:

Recommended concentrations for enclosed high pressure systems range from 4 to 10 oz/gal for 10 to 20 minutes at 160° to 200°F.

HOT VAC OPERATIONS: use 6 to 10 oz/gal.

***NOTICE:** All detergents used in the manufacturing of this product are certified to be biodegradable. This is an industrial strength cleaning compound designed for use by trained institutional professionals. Label directions and precautions must be followed exactly. The manufacturer will not be responsible for any injury, loss or damage, if product is used in any manner not in compliance with label directions or if precautions are not observed.
