

DESCRIPTION

Express is especially formulated to handle heavy duty cleaning situations. Use Express to remove a wide variety of soils from galvanized metal, porcelain, stainless steel, concrete, carbon steel, aluminum, copper, plastic, rubber, neoprene, thermoplastic cable insulation, vinyl, and most other water safe surfaces. It works safely, quickly, and easily to prepare surfaces for painting, labeling, and marketing. Use almost anywhere oil, dirt, filth and grease are not desired. This formula is non-flammable and halogen free.

DIRECTIONS

Spray liberally onto the surfaces you wish to clean. Wipe off with a clean towel, either dampened or dry. Heavily soiled surfaces may require a brief soaking period before wiping.

QUALIFIED

This product is manufactured with the highest quality materials. Each batch of Express is produced and tested to ensure a lack of contamination from high levels of halogens (chlorine, bromine, fluorine, and iodine), sulfur, and low melting point metals (mercury, cadmium, bismuth, antimony, lead and tin). The recipient of this product who intends to use it in "critical use" areas of fission reactors should check vendor certification against the standards or requirements adopted at their facility. For specifics on testing, contact Wechem, Inc
