

## DESCRIPTION

**FLEET 200** is the second step in a two-step cleaning system designed to be used with the Wechem two-step, cold water, high-pressure washer. This system is designed to clean heavy-duty equipment and over-the-road trucking equipment, such as truck trailers. When used as directed, this system is the most efficient cleaning system available today. It will remove heavy soils (including carbon stack stains) from diesel exhaust and it tackles the hard to remove magnetic road film on painted surfaces. In addition, **FLEET 200** can be used through pressure cleaning equipment for general cleaning and degreasing of many types of equipment, trucks, cars, buses, etc. **FLEET 200** is safe for use on glass, plastic and polished or anodized aluminum surfaces.

## DIRECTIONS

Place the #2 hose directly into container. The pressure cleaning system will automatically dilute concentrate to the proper cleaning strength. Apply **FLEET 200** onto a vehicle surface directly on top of surface saturated with **FLEET 100**. After covering with Fleet 200, switch machine to rinse position and rinse detergent and grime off of the surface. Always rinse thoroughly from the top down. Never allow this product to dry on the surface.

**Fleet 200** may be used as a one-step cleaner for surfaces that contain glass and polished or anodized aluminum surfaces.
