## FORMULATION BASE

### HULK SYSTEM SOLO PROGRAM DESCRIPTION

The **Hulk System Program** was formulated as a replacement technology for consumers who purchase large quantities of detergents in bulk tanks, totes or multiple drums. It utilizes the latest chemical technologies to simplify the transportation, storage and use of detergents while drastically reducing all associated costs.

Our patented chemical dispensing **HULK SYSTEM®** is a self contained, free standing unit which simplifies the cleaning process. Just connect our unit to your water supply then it's an easy spray on, let soak and rinse off procedure. The **Hulk System®** saves you time, money, storage space, and provides unmatched quality control.

## ABOUT THIS FORMULATION

**Hulk System® 250LF Formulation Base** is a 100% active hyper-concentrate designed exclusively for use through the **Hulk System®** Detergent Dispenser. When used as directed, this material will produce large quantities of concentrated detergent. This hyper-concentrated product is comparable to many competitive concentrates and may be further diluted prior to use.

**Hulk System® 250LF Formulation Base** was designed to produce an effective concentrated material that will meet or exceed the tightest standards for employee safety and/or adverse environmental impact. It only utilizes components that are inherently biodegradable.

**Hulk System® 250LF** is designed for durable industrial surfaces and should be used with care. Users should pretest prior to wide spread application.
