SUPERIOR SOLUTIONS

The HULK Program

Most Advanced Cleaning System for the
Refinery, Petroleum and Chemical Industries

We Bring Clean to Another Level!

The HULK System

ADVANTAGES / BENEFITS:

- Hyper-Concentrated Chemistries.
- Ease of Operation - Spray On, Let Soak, Rinse Off.
- Less Labor Intensive - eliminates ergonomic issues of carrying buckets of detergents/degreasers.
- Safer for Employees to Use - greatly reduces eye and skin contact with cleaning solutions.
- Quality Control - NO Mixed Batches.
- Batch Coded - each drum is batch coded.
- 95% Less Bulk Storage Space.
- Self Contained, Free Standing Unit.
- Operates on Water Action Alone - no need for additional power source.
- Doesn't interact with waste water treatment.

HOW THE SYSTEM WORKS:

The Hulk System® is a self-contained unit that is kept at the job site and connected to an available water source. The unit works by water action alone, no electrical connections are needed. The container of hyper-concentrate is placed beneath the dispenser on the stand and the supply hose is attached to the container. As water flows through the unit, the dispenser extracts the precise amount of hyper-concentrate into the mixing chamber where it combines with your water and dispenses through the discharge hose. The operator simply opens and closes a valve on the discharge hose to dispense. *It's that simple!*

“The HULK System can reduce your labor costs by 50% or more, while also reducing on the-job safety incidents.”

The HULK Turnaround and Spill Cleanup

Extreme cleaning during turnarounds, not everyday maintenance

ADVANTAGES / BENEFITS:

- Faster Clean up Time - quick application for vertical and horizontal surfaces.
- Safer for employees - no steam cleaning with potential burns to operator
- Covers large areas quickly.
- 200 times more efficient than outdated bulk clean up systems.
- Operator friendly.

The HULK Injection / Process Cleaning

*Uses **PHASE OUT** degassing and degreasing agent.*

This formulation is excellent for the removal of heavy hydrocarbon deposits and contamination from vessels, chambers, tanks and equipment. **PHASE OUT** can be used in circulation, steam/vapor processing and flush-on/flush-off applications.

ADVANTAGES / BENEFITS:

- Reduces/Eliminates H₂S and LEL Levels.
- Biodegradable.
- Non-Hazardous and non-toxic chemistries.
- Excellent degreasing properties, superior molecular chemistry, eliminates re-depositing of hydrocarbon residuals on surfaces.

REGULATORY COMPLIANCE:

If your facility uses chemical compounds, you are subject to significant regulatory statutes. Our staff goes the extra mile to ensure that the necessary documentation needed for industrial grade products are provided.

LABELING:

OSHA regulations require that all primary packaged products and most secondary work containers contain specific hazard communication information. Hulk System® labels contain all the information necessary to comply with prescribed regulations. Information provided includes: product description, product use directions, cautions and warnings, first aid information, N.F.P.A. symbol, and D.O.T. shipping information. We will provide you with labels for your secondary containers to assure proper product safety and performance.

SAFETY DATA SHEETS:

As a user of industrial grade chemicals, you must meet very specific requirements of OSHA's hazardous communication standard. Safety Data Sheets (SDS) are a big part of this requirement. When you order your Hulk System® containers, you will receive the SDS documents required for compliance. In addition, when we change or update the SDS you will receive the new version with your next order. Of course, you may call us anytime and request a current copy or visit our website at www.wechem.com to download a .pdf copy on your own.

DEPENDABILITY:

With our Hulk System®, you get proven quality for a leader in the industry. We have been perfecting our products for over thirty years, so you can depend on us to give you consistent chemistry with every cleaning application. We also offer customized cleaning programs, in-service demonstrations and employee training on chemical awareness. Please call us at 1.800.426.0512 for your FREE presentation on how we can save you time and money!
