

DESCRIPTION

SUPER BC is a heavy duty concentrated cleaner that is chemically designed to remove heavy soap scum, body oils, mineral deposits, rust and other soils found in showers, tubs, urinals, bowls and other hard surfaces. **SUPER BC** contains a cherry fragrance, dual food grade acid system, powerful detergents and quaternary ammonium chlorides. It will effectively remove a wide variety of contaminate soils off ceramic tile, fiberglass, porcelain, stainless steel, chrome and other institutional surfaces. In addition to its superior cleaning ability, **SUPER BC** counteracts odors at their source and leaves surfaces with a fresh clean scent. Use of this product increases the level of sanitation in shower rooms, locker rooms, restrooms and other areas where it is used.

DIRECTIONS

This product is a concentrated cleaner and should be diluted with water prior to use. Dilution will vary in accordance with soil conditions. Typical applications range from 2 to 12 ounces of **SUPER BC** per gallon of water to produce the finished product.

Cleaning Procedure:

1. Spray diluted product on surface to be cleaned until completely wet. Use of a foam application will increase chemical dwell time.
2. Allow **SUPER BC** to contact surface for 60 seconds to penetrate deposits. Heavy build-up may require longer contact time, or agitation. Do not allow product to dry on surface.
3. Wipe with a sponge, cloth or brush.
4. Rinse with clean water.
