

CRUDE CUTTER is a heavy duty solvent degreaser. This formulation contains a blend of high grade solvents, penetrating agents, and wetting agents. Use **CRUDE CUTTER** to remove the most stubborn contaminants, including: heavy base petroleum crude oil, fuel, grease, oil base coatings, tar, cosmoline, carbon, and asphalts.

DIRECTIONS

CRUDE CUTTER is simple and easy to use, spray on and flush off. It is formulated for direct application and removal from the surface. The user only needs to apply the product to the surface (spray on, wipe on, or brush on) and allow it to soak into the soil. The solvent action of the formulation will liquefy and lift the crude oil from the surface, allowing for easy removal.

SOAKING APPLICATION

Allow product to soak for thirty (30) minutes or longer depending on contamination, agitate with brush if needed, and flush with water. May be used on any surface not harmed by petroleum distillates.
