- **NON-FLAMMABLE**
- **NON-CHLORINATED•**
- **PENETRATES & CLEANS**
- **FREES FROZEN FITTINGS**
- **LEAVES PROTECTING, NON-DRYING,
WATERPROOF FILM**
- **DRIES OUT ELECTRICAL EQUIPMENT**

PENETRATES through rust and scale to loosen parts which have been frozen by corrosion. **LUBRICATES** parts to ensure free and easy movement. **DEMOISTURIZES** and creates a waterproof film that dries out electrical equipment, inhibits corrosion and prevents electrical discharge. **PROTECTS** and creates a non-drying film that seals parts against atmospheric and mild chemical corrosion.

DIRECTIONS:

To Remove Corrosion:

Spray liberally directly onto dirt and scale. Allow to penetrate. Remove loosened scale, then reapply to leave an anti-corrosion coating.

To Displace Moisture:

Spray electrical equipment until thoroughly saturated. Allow to penetrate before attempting to restart, then reapply to protect surfaces.

To Loosen Frozen Nuts and Bolts:

Spray liberally to frozen nuts and bolts, hinges and sliding and rotating parts. Allow to penetrate into threads. Work back and forth, then reapply to leave a never-dry, protective lubricating film.

To ensure adequate protection, reapply periodically.

IDEAL FOR USE ON:

- **Locks / Hinges**
- **Nuts / Bolts**
- **Tools**
- **Rods / Reels**
- **Distributors**
